Fallen Oak Farm’s Chicken CSA

2013

Chicken will be available in CSA shares for the 2013 season. Fresh whole all natural pastured chicken will be available in full or half shares. Full shares will receive six chickens in May, July, and September for a total of 18 chicken. Half shares will receive three chickens at each distribution for a total of 9 birds. Chickens are sold as whole broilers but are available cut into pieces for an additional charge. Giblets, necks and other pieces are available on request.

Our chickens are Cornish Cross breed chickens and are pastured in our “chicken tractors” where they are moved to fresh pasture every day and protected from predators. We also provide an organic chicken feed blend made with non-GMO corn and roasted soybeans as well as other organic ingredients. This mix is fed in addition to the good things they scratch and peck up in the fields.

The chickens are carefully processed by a licensed processor and come frozen in vacuum-packed bags. Weights may vary but most will weigh between 3.5 and 4.5 pounds. The price for a full share is $280.00. A half share is $150.00. We have a limited number of shares, so be sure to reserve yours soon. You can reserve and pay for them by mailing a membership form and check to the farm.

You’ll be notified of specific pick-up dates about 30 days prior to processing. Pick-up locations will include our farm in Davison and additional locations in Rochester and Lansing.

If you have questions, please don’t hesitate to call (810) 265-2632, or shoot us an e-mail at fallenoakfarmmi@gmail.com

About Fallen Oak Farm.....

We are a small family farm located in Davison, MI. We’ve been using organic principals to grow our own produce, and flowers for over 20 years. In 2011 we added chickens, and who knew they’d be so much fun! After raising laying hens for eggs and a few meat chickens for our own table, we found that others wanted to buy their food from us too. In 2012 we became a Certified Naturally Grown Farm. Today we are growing several acres of produce, and have developed healthy pastures for our flock. Our products are available at farmer’s markets, our own on-farm store and through our website.
